

Aotearoa New Zealand's Reform of Vocational Education and Training (RoVE) Te Pūkenga (NZ Institute of Skills and Technology) aspirations and promises

Free online AVETRA webinar presented by Dr Selena Chan
Wednesday 13 October 12:10 to 12:50 (AEST) 14:10 to 14:50 (NZ)

The Aotearoa NZ Labour government in 2019 embarked on a sweeping restructure of VET, the Reform of VET (RoVE). Formal divisions between work-based and formalised VET were removed, new strategic and governance bodies were established, and a more responsive/equitable funding system promised. The 11 Industry Training Organisations (ITOs) supporting workplace learners and 16 Institutes of Technology and Polytechnics (ITPs) are now in the process of transitioning and merging into Te Pūkenga (NZ Institute of Skills and Technology).

Te Pūkenga's charter and its ambition is to ensure the 'learner is at the heart of learning' is presented and critiqued through an exploration of the final draft its 'service concepts'. These service concepts, describe Te Pūkenga's operational functions and intentions to ensure equitable access and outcomes through the provision of 'flexible and adaptive' learning approaches.

Dr Selena Chan is an educational developer at Ara Institute of Canterbury in Christchurch, Aotearoa New Zealand. Her research informs her work which includes facilitating curriculum development, technology-enhanced learning projects, and academic staff development

Selena has published widely in vocational research journals; authored two books (the most recent – Digitally enabling 'learning by doing in vocational education'); and is the co-editor for AVETRA's International Journal of Training Research and on the editorial board for the Journal of Vocational Education and Training.
