

**VET research information from around the world:
VOCED - Australia's international Vocational Education and
Training research database**

Sarah Hayman
Manager, Information Services and Clearinghouse, NCVET

This session will provide an overview of the VOCED research database, Australia's free international VET research database, produced by NCVET and available on the World Wide Web. It will cover what can be found in the recently expanded database, how to use the most effective searching techniques, how to obtain the full documents which are described in VOCED, and how to contribute your own research VOCED. The database will be demonstrated live, with the latest (March 2000) upload of entries included. Those who want to try their own searches will have an opportunity to do so at the end of the session, and also at NCVET's stand during the Conference.
